PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience in full-stack development and enterprise automation at Fidelity Investments. Completed Advanced Certificate Programme in Applied AI and Machine Learning from IIT Madras. Proven impact automating 70% of API code generation, cutting manual processing time by 70%, and maintaining 99.8% platform uptime.

EDUCATION

Master of Science, Computer Science Aug 2026 – May 2028
Stony Brook University, Stony Brook, NY

Bachelor of Engineering, Information Science and Engineering Aug 2019 – Aug 2023
BMS College of Engineering, Bangalore

PROFESSIONAL EXPERIENCE

Fidelity Investments | Software Engineer *Aug 2023 – Aug 2026*
Bengaluru, India

- Maintained and enhanced Developer Toolkit platform processing 500+ API generation requests monthly across 70+ internal product teams, automating 70% of code generation from Swagger specifications to production-ready Spring Boot microservices
- Enhanced Spring Boot code generation engine using Template Method and Factory design patterns while resolving critical P1/P2 incidents, improving automation reliability by 30% and maintaining 99.8% platform uptime
- Contributed to enterprise-wide migration to the new Enterprise Java Framework (EJF), collaborating on the MVP0 rollout across the organization's Java services
- Co-built a CLI-based regression testing tool that auto-generates a reference application from historical test data, automating module-level testing that previously took the team roughly two weeks per cycle
- Led GitHub Copilot POC evaluation implementing prompt engineering techniques across 5 engineering teams, achieving 25% improvement in code generation speed and developer productivity

Software Engineering Intern *Feb 2023 – Jul 2023*

- Engineered full-stack Intelligent Document Processing system using AWS Textract, Python, and Angular to digitize 1000+ handwritten Workplace Investments (WI) documents monthly, reducing manual data entry time by 70% and improving data accuracy by 60%
- Designed interactive Angular UI with dynamic rectangle detection zones for real-time OCR boundary fine-tuning; built proof-of-concept End-to-End Stock Market Robo Advisor platform using Angular, Node.js, and Spring Boot with real-time market data and risk assessment

PROJECTS

COVID-19 Decision Support System | Team of 4

- Co-developed an IoT-enabled home screening system combining vitals (heartbeat, temperature, oxygen saturation) with chest X-ray analysis in a two-stage diagnostic pipeline; placed 6th college-wide in the project showcase

Krishiva — Organic Farming Ecosystem Platform | GitHub

- Built a full-stack mobile platform connecting organic farmers, agricultural experts, and buyers, featuring an AI farming assistant (Llama-3.1-8b via Groq API), real-time messaging, and a marketplace; implemented MongoDB aggregation pipelines powering a Razorpay-based verified-user promotion system

ACHIEVEMENTS

- Part of team awarded the FAE Acceleration Team Award at Fidelity Investments for driving a 40% productivity boost across 830+ applications
- Published "Movie Recommendation System Using SVD (Letterboxd)" — IJARCCE 12(10), Oct 2023

CERTIFICATIONS

- Advanced Certificate Programme in Applied Artificial Intelligence and Machine Learning: IITM Pravartak Technologies Foundation, IIT Madras (Mar 2025 – Mar 2026)
- AWS Certified Cloud Practitioner: Amazon Web Services (June 2024 – June 2028)
